ABOUT ME

I am Nayan Dobariya, currently pursuing Semester 5 of the Integrated Master of Computer Applications (IMCA) program at LJ University. I am originally from Sultanpur, District Rajkot, Gujarat. I have a strong interest in web developer and I am working towards building my skills in the field of computer applications.

TECHNICAL SKILLS

HTML,CSS,JAVA SCRIPT
JSON,TYPE SCRIPT
JQUERY,REACT JS

PHP,LARAVEL
PYTHON,DJANGO
MYSQL

PROJECT

- **Hospital management system**

   Key Technologies Used:-html,css,javascript,php,mysql,xamp

   Hospital management system Hospital Management System includes five main user roles: Admin, Doctor, Patient, Receptionist, and Billing Staff. The Admin has full control over the system, managing users, departments, and settings. Doctors can view appointments and patient records, and update prescriptions and medical histories. Patients can manage their own profiles, book appointments, and view prescriptions and bills. Receptionists handle patient registration, schedule appointments, and assist with billing. The Billing Staff is responsible for generating invoices, managing charges, and tracking payment records efficiently.

- **Social media platform**

   Key Technologies Used:html,css,javascript,ajax,bootstrap,php, laravel,mysql,xamp

   This Laravel-based social media platform allows users to create posts, like and comment on them, send and accept friend requests, and receive real-time notifications for all activities. Friends can chat with each other through a live chat box where messages are stored and instantly delivered using Laravel Echo and WebSockets. An admin panel enables administrators to manage users, moderate content, and toggle user roles between admin and regular user, ensuring smooth rolebased access control throughout the system
